

Everything in **Builders' Hardware**

It is most important to select the best hardware for that new home or building.

That brings you here, for we make a point of carrying nothing but the best builders' hardware that adds not only to the beauty of a building, but to its selling value as well.

The sash and door locks, hinges, etc., are a very small part of a building, but will repay many times for the cost and trouble of proper selection. Cheap goods are a continual source of trouble and worry.

We are prepared to name interesting prices on the complete hardware for any style of building from the humble cottage to the largest office building.

Yes, Sir! We also sell the best building toolsall moderately priced.

Desolate West Africa. Lobito bay, in Portuguese West Africa, is a wonderful natural harbor and also a place for splendid oysters. They are long shelled oysters and grow on trees. At low tide these oysters (very good eating) are picked off the trunks of the trees below high water mark. These oysters constitute a pleasant welcome to what for 100 miles inland is a desolate territory. Between the short and the interior plateau lies the "thirsty country," where no rain has fallen for years. Everything is a dull dead gray and the only trees that flourish are the gigantic baobabs, which grow like an inverted cabbage and yield cream of tartar. In building the railway through this district, of every 100 men employed thirty were occupied in carrying up supplies of water.

Damage Done by Soot. The acids contained in soot attack mortar, masonry, woodwork, metal work and building material generally In many European cities it has been found that soot causes the rapid disintegration of statuary and public monuments. The damage done to inside decorations appears to be no less important than the effects upon the exterior of buildings. Smoke is visible proof of imperfect combustion of fuel, and consequently
